**CALIFORNIA'S POPULATION INCREASES BY 346,000,
CONTINUING THE STATE'S MODERATE GROWTH RATE**

FOR IMMEDIATE RELEASE:
December 16, 2015

CONTACT: John Malson (916) 323-4086
H.D. Palmer (916) 323-0648

SACRAMENTO – California's population grew by 346,000 people between July 1, 2014 and July 1, 2015 to total 39.1 million, according to official population estimates released today by the Department of Finance. This represents a growth rate of 0.9 percent.

Birth rates have stabilized but remain below historical averages. Natural increase, births minus deaths, remains the primary source of the state's population growth. The natural increase of 262,000 is comprised of 507,000 births minus 245,000 deaths.

Net migration added 84,000 persons to California last year. Net migration includes all legal and unauthorized foreign immigrants, residents who left the state to live abroad, and the balance of the hundreds of thousands of people who move to and from California from within the United States.

Since the national census on April 1, 2010, the state has gained 1,817,000 persons. While much of this growth was initially in the urban coastal counties, inland counties have shown recent gains as well. Smaller counties in more remote areas of California are either still losing population or growing very little.

This release incorporates an adjustment of the series back to 2010 reflecting the availability of improved and more detailed migration data, including state-to-state domestic migration data from the Internal Revenue Service and international migration data from the Department of Homeland Security. The increase is concentrated in the early part of the decade with a total revision by 2014 of 226,000, or just over half of one percent. In the prior series, the state gained 1.25 million residents between April 2010 and July 2014; in the revised series, California gained 1.47 million residents over that time period.

Highlights of the July 1, 2015 county population report include:

- California has 58 counties ranging in size from Alpine County, with just over 1,100 residents to Los Angeles County with over 10 million residents.
- The state's nine largest counties are Los Angeles, San Diego, Orange, Riverside, San Bernardino, Santa Clara, Alameda, Sacramento, and Contra Costa. Each has over one million residents. These counties represent 70 percent of California's population.
- Los Angeles, San Diego, Orange, Riverside, and Santa Clara counties posted the highest numeric population gains and account for over half of the state's growth. Growth

in these counties was due primarily to natural increase, although most of the counties had positive net migration as well.

- San Joaquin, Monterey, Santa Clara, Yolo, Alameda, and Contra Costa counties had the largest percentage increases in population, each growing by 1.3 percent or more. Population change ranged from the highest growth rate of 1.6 percent in San Joaquin to -2.6 percent in Lassen.
- Although natural increase was a significant source of growth in the state, 11 counties experienced natural decrease (more deaths than births during the year) – Amador, Calaveras, Lake, Mariposa, Modoc, Nevada, Plumas, Sierra, Siskiyou, Trinity, and Tuolumne.

Population estimates produced by the Department of Finance are mandated by the California Constitution and various codes. They are used by state agencies, California counties, academic institutions, private research organizations, the media, and the public. Primary uses include budgeting, needs assessment, program planning and evaluation, distribution of state funds, and the calculation of rates (such as birth, death, and incarceration).

Population estimates are developed using aggregate data from a variety of sources, including birth and death counts provided by the Department of Public Health, number of driver's licenses and driver's license address change data from the Department of Motor Vehicles, housing unit data from local governments, school enrollment data from the Department of Education, and federal income tax return data from the U.S. Internal Revenue Service. These statistical reports of administrative records do not disclose any information about individuals.

County ranking tables, maps, and the E-2 (*California County Population Estimates and Components of Change by Year, July 1, 2010-2015*) methodology and data tables are included. The E-2 and companion reports E-6 (*Population Estimates and Components of Change by County, July 1, 2010-2015*) and E-7 (*California Population Estimates, with Components of Change and Crude Rates, July 1, 1900-2015*), are on the Department's website:

July 1, 2015 Population Estimates

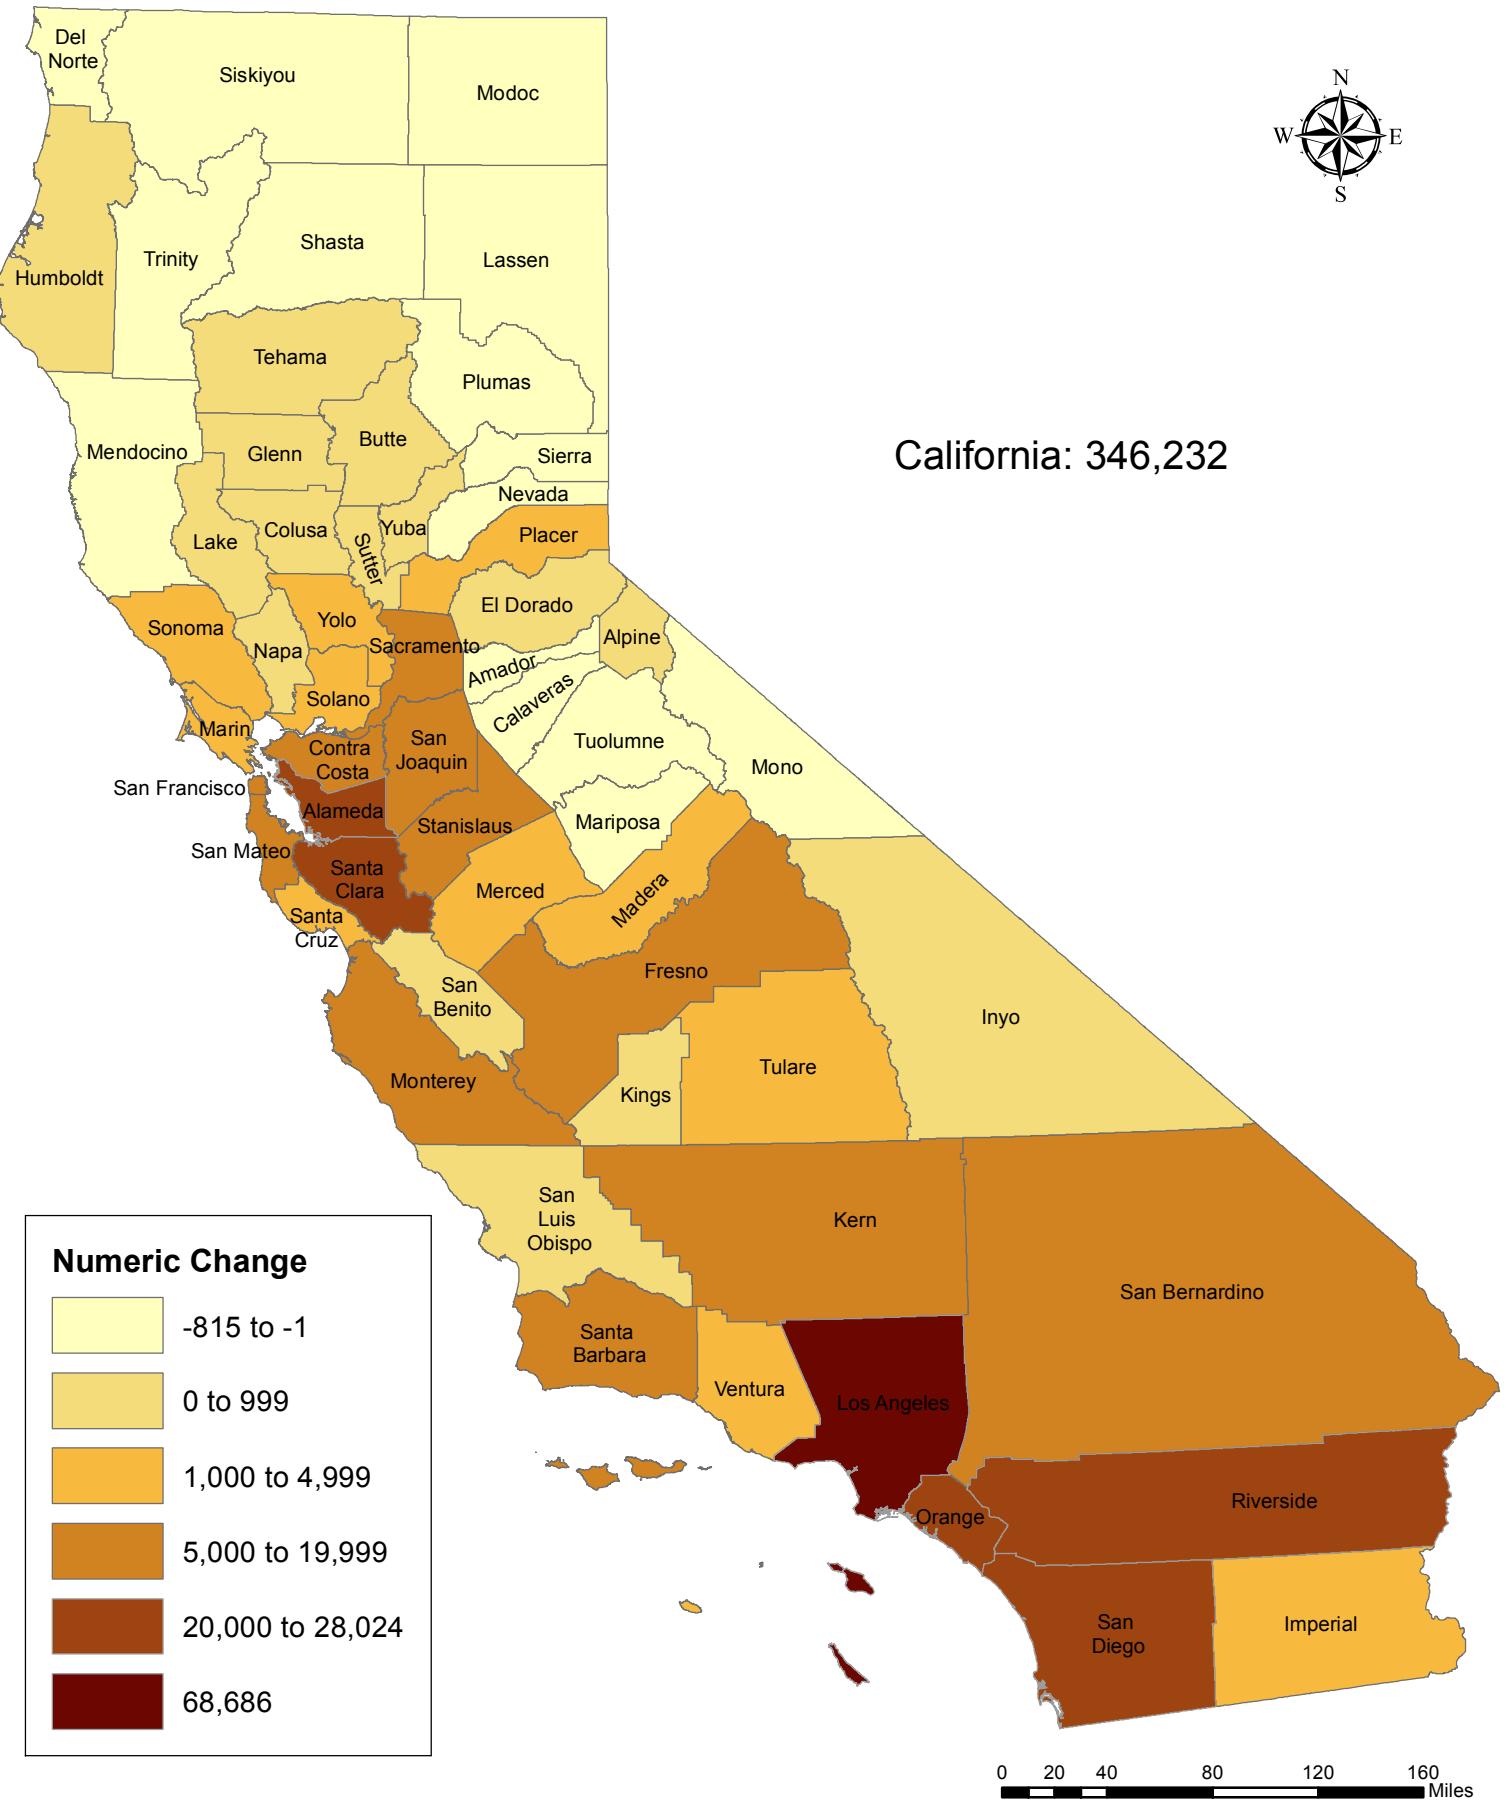

Population Distribution by County

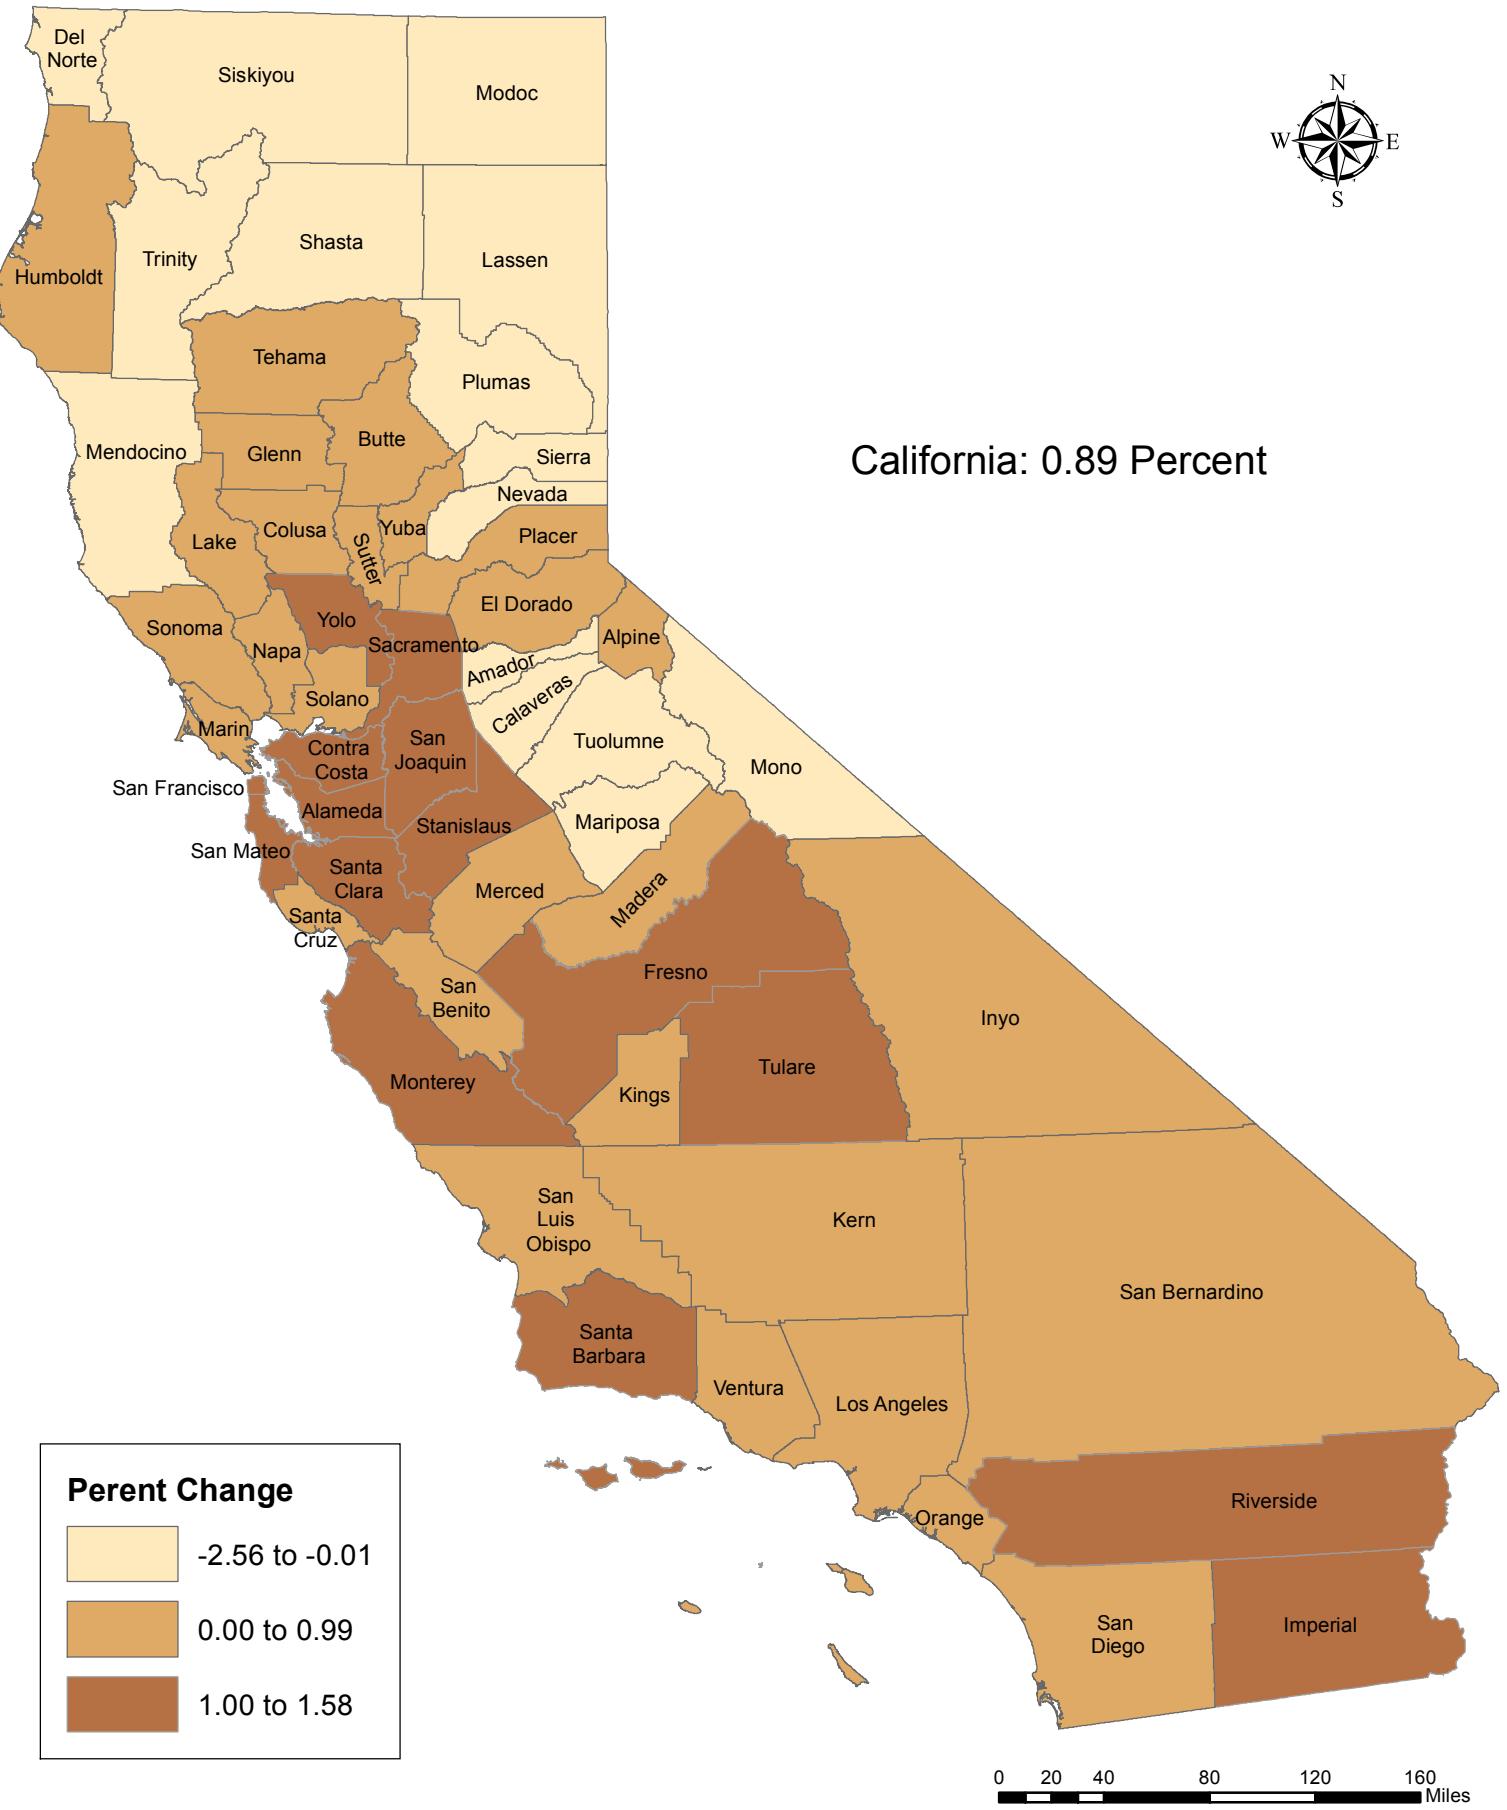

July 1, 2015 Population Estimates County Percentage of California's Population

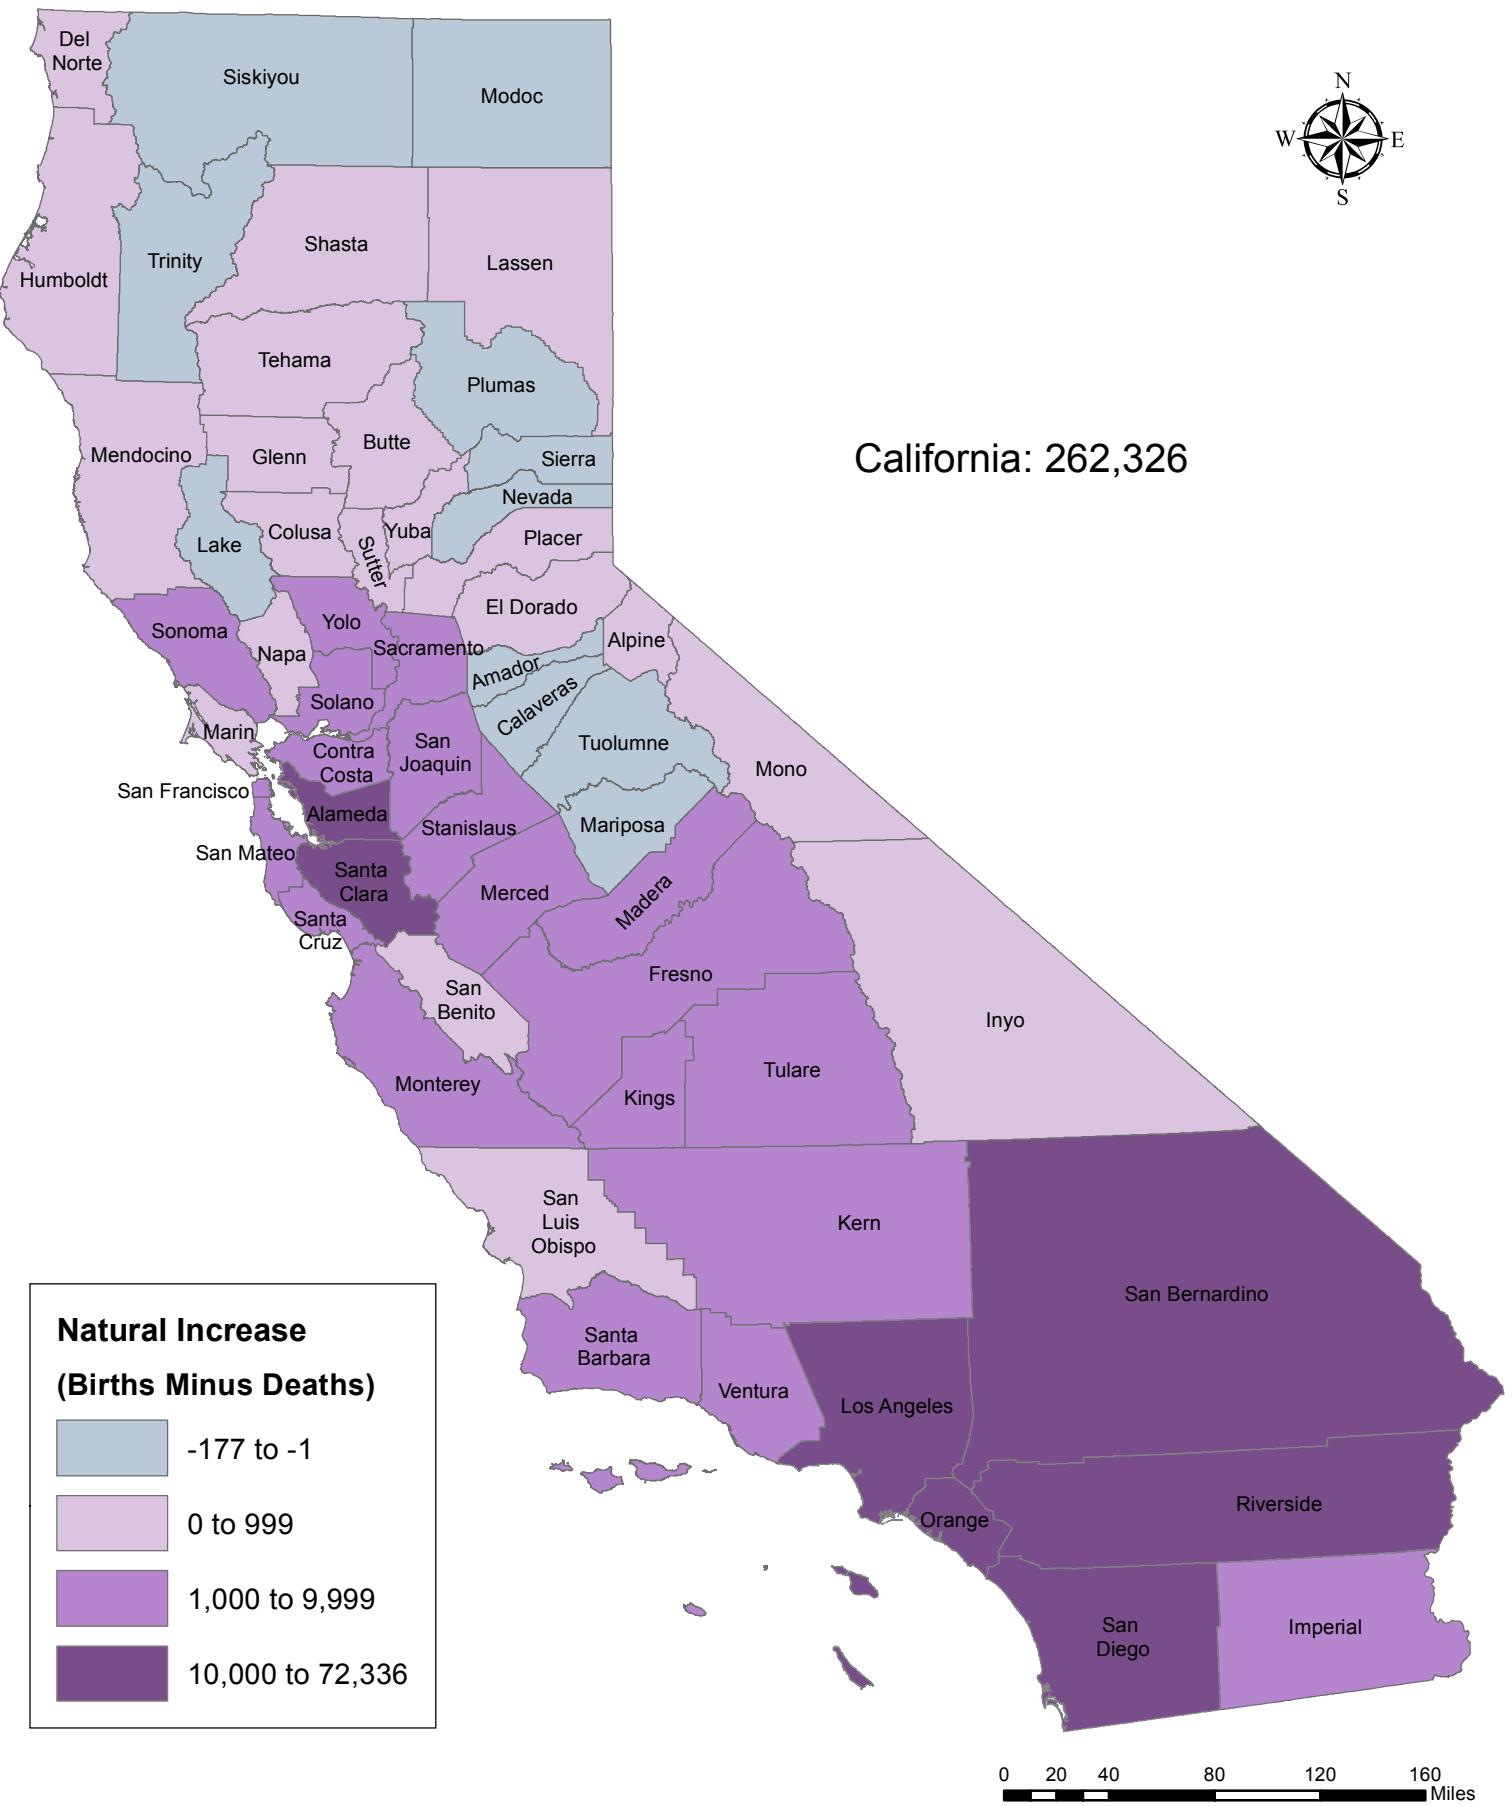

July 1, 2014 to July 1, 2015 Population Estimates Numeric Change

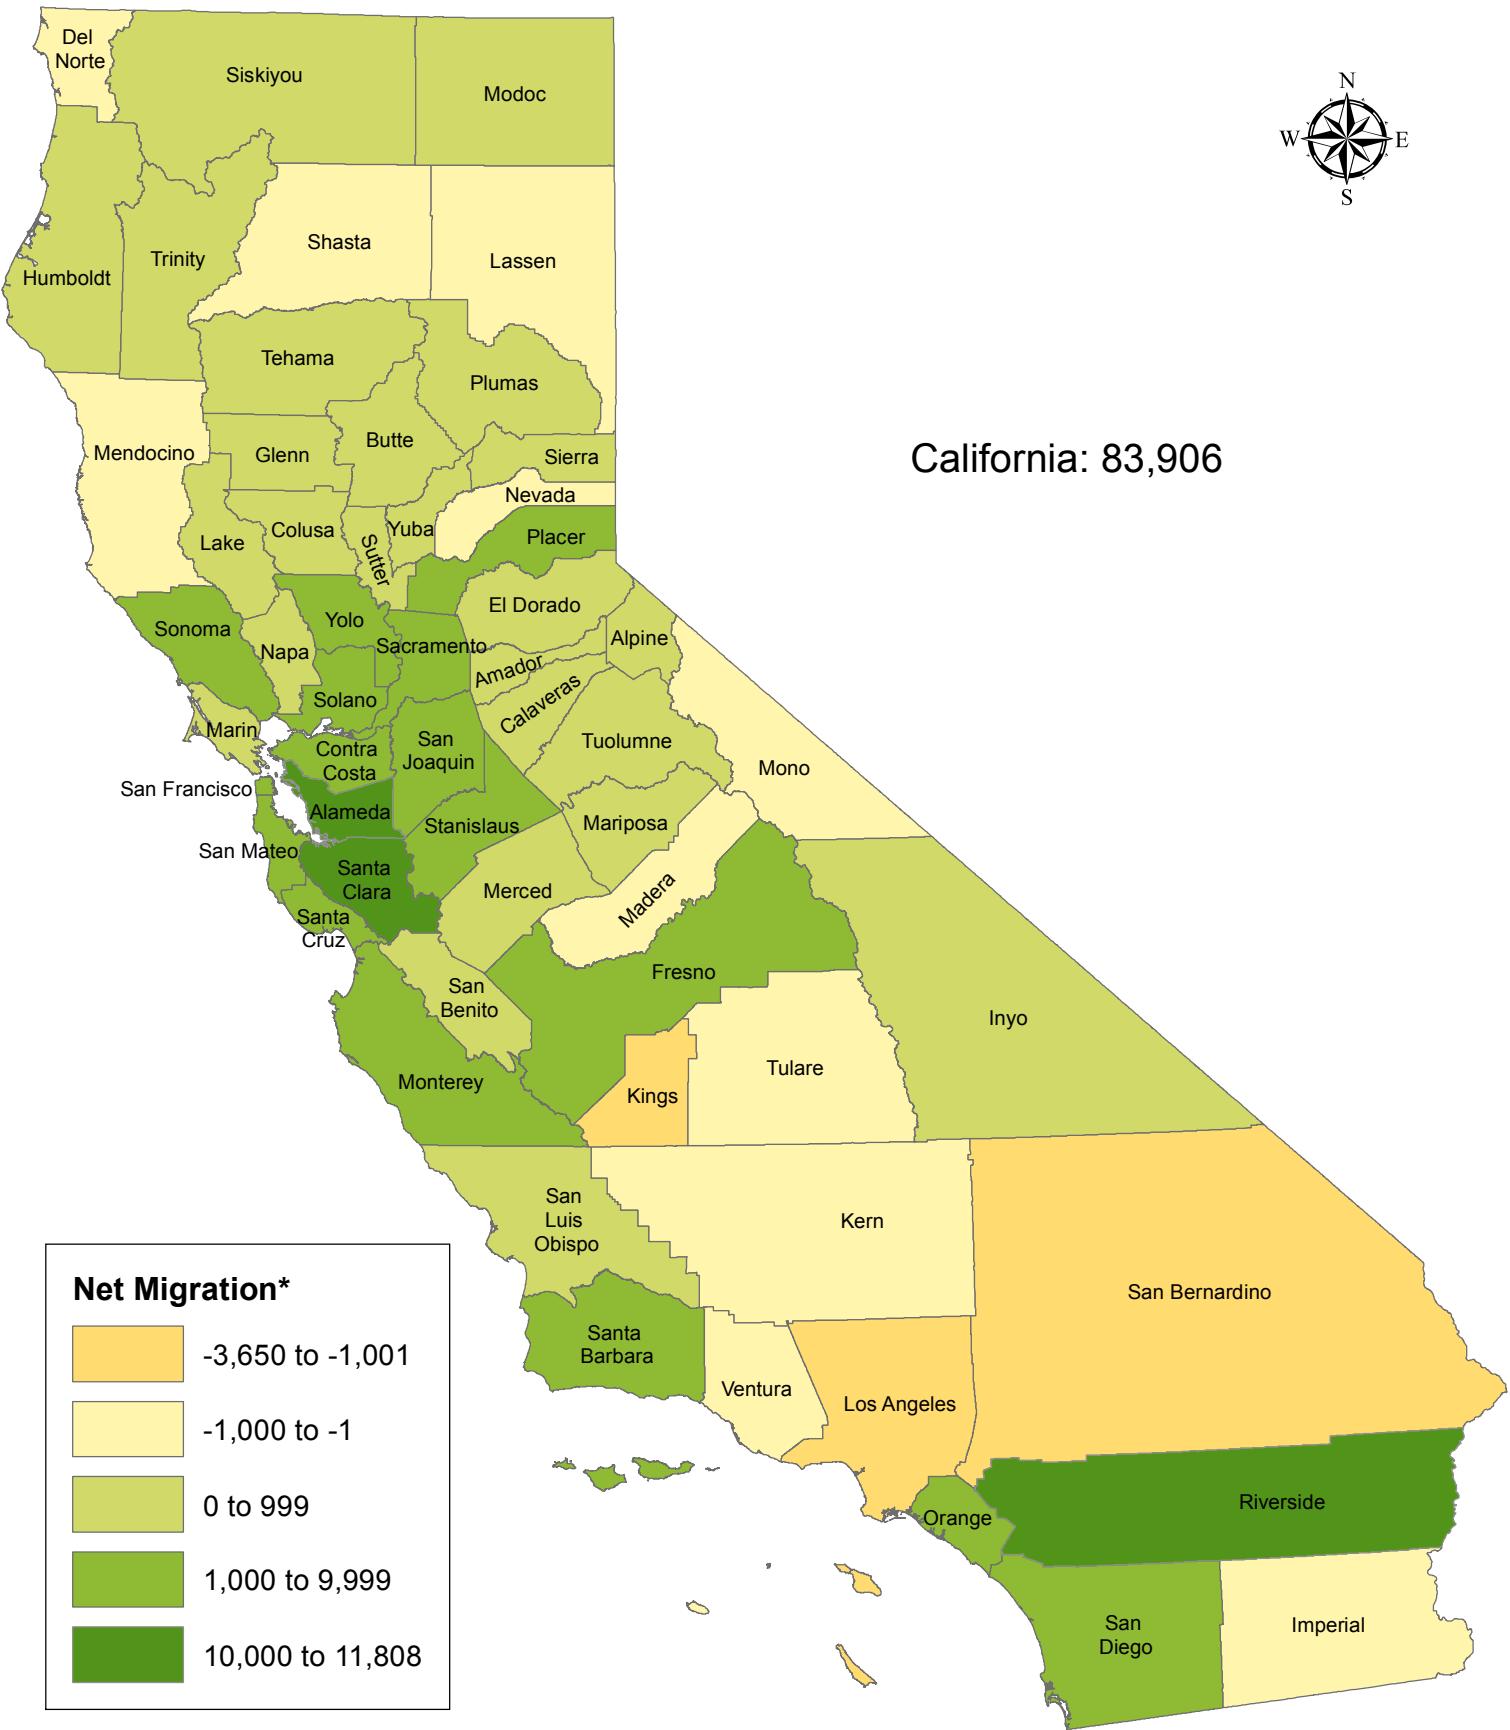

July 1, 2014 to July 1, 2015 Population Estimates Percent Change

July 1, 2014 to July 1, 2015 Population Estimates Natural Increase

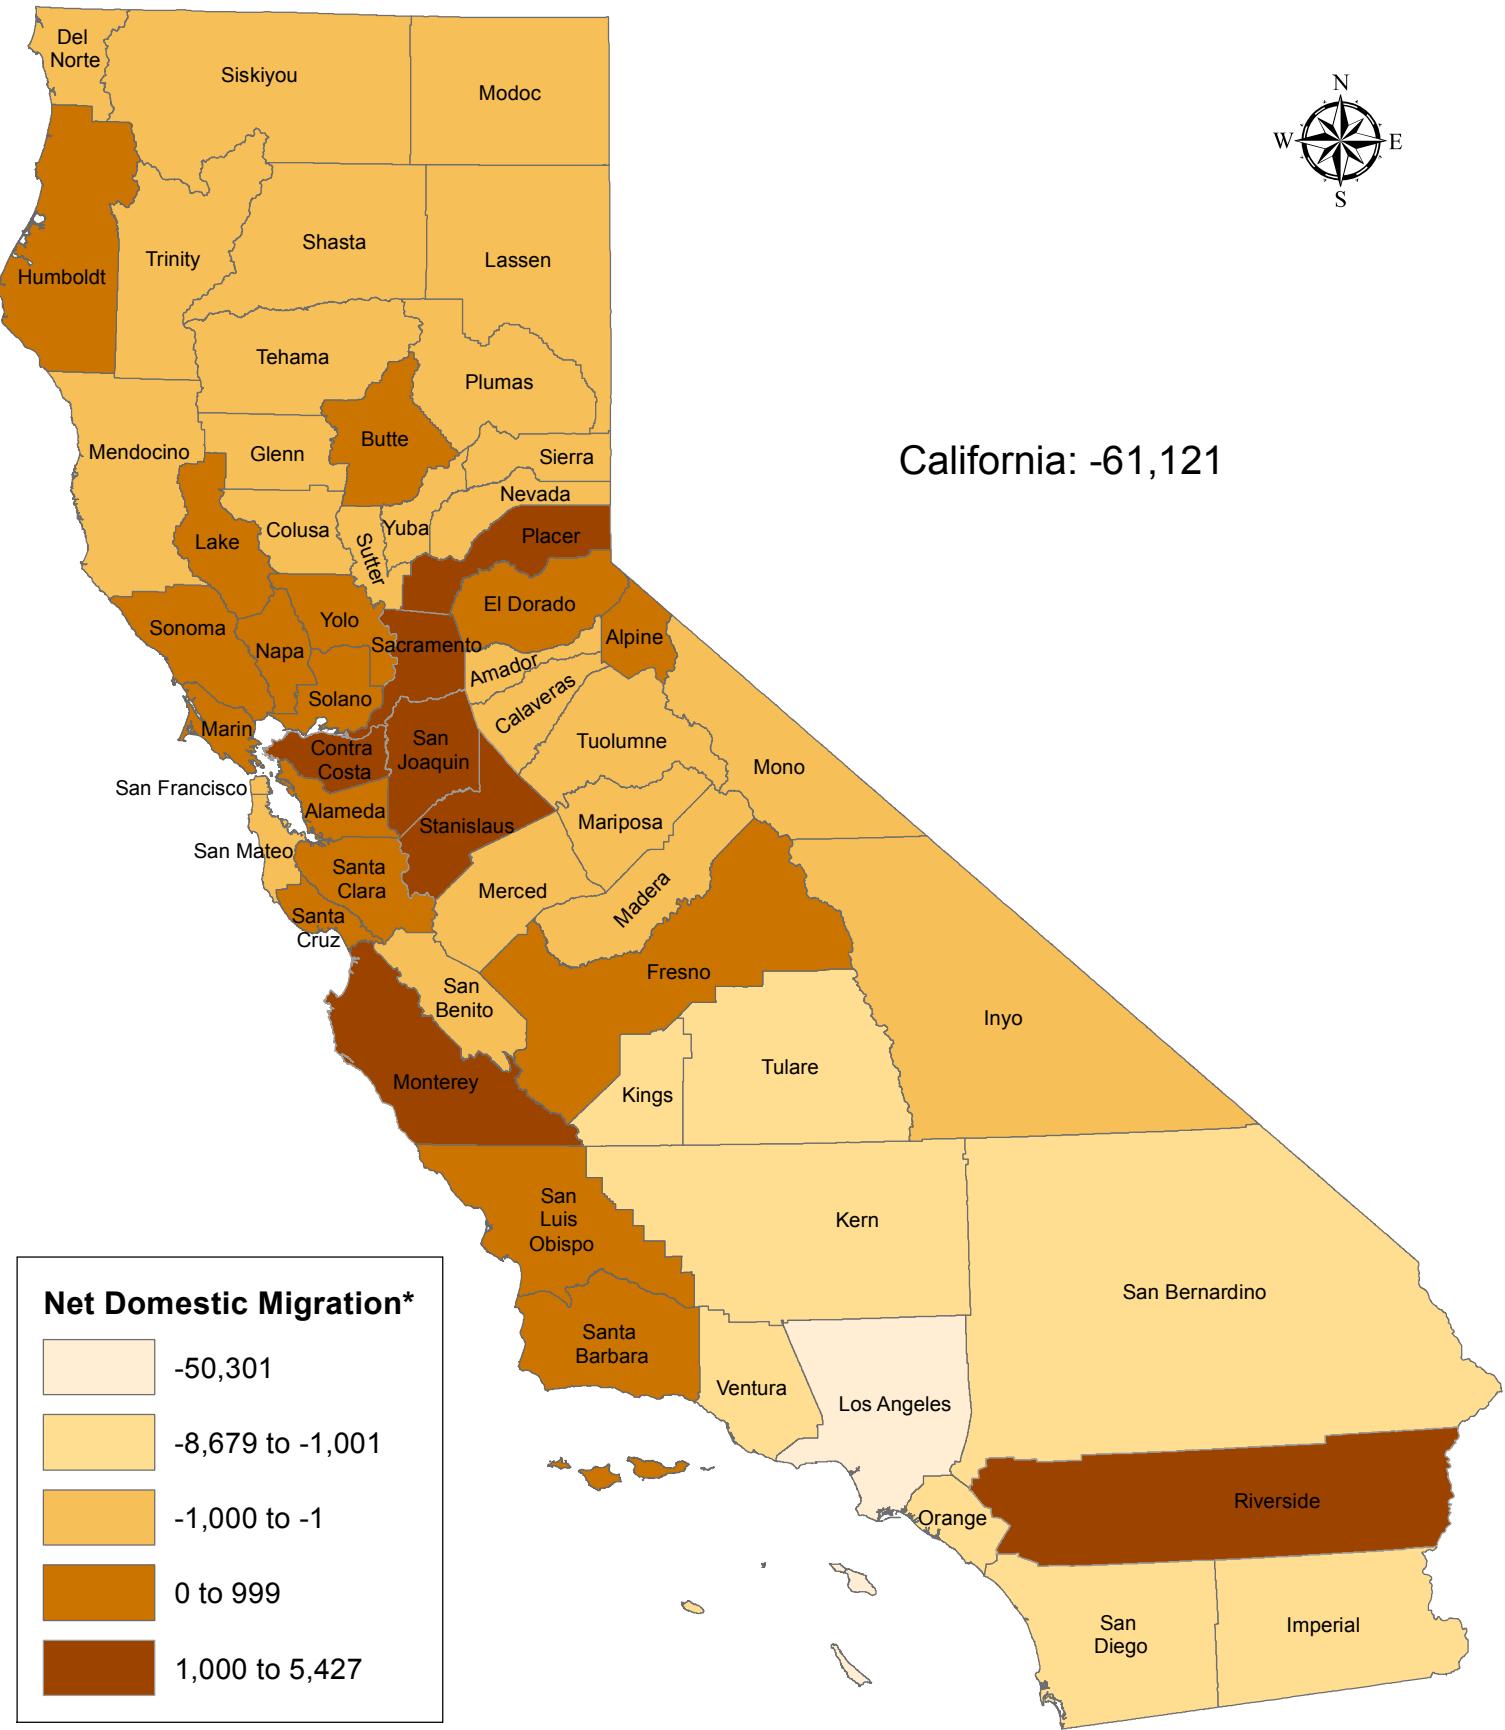

July 1, 2014 to July 1, 2015 Population Estimates Net Migration

*The sum of net domestic migration and net immigration.

0 20 40 80 120 160 Miles

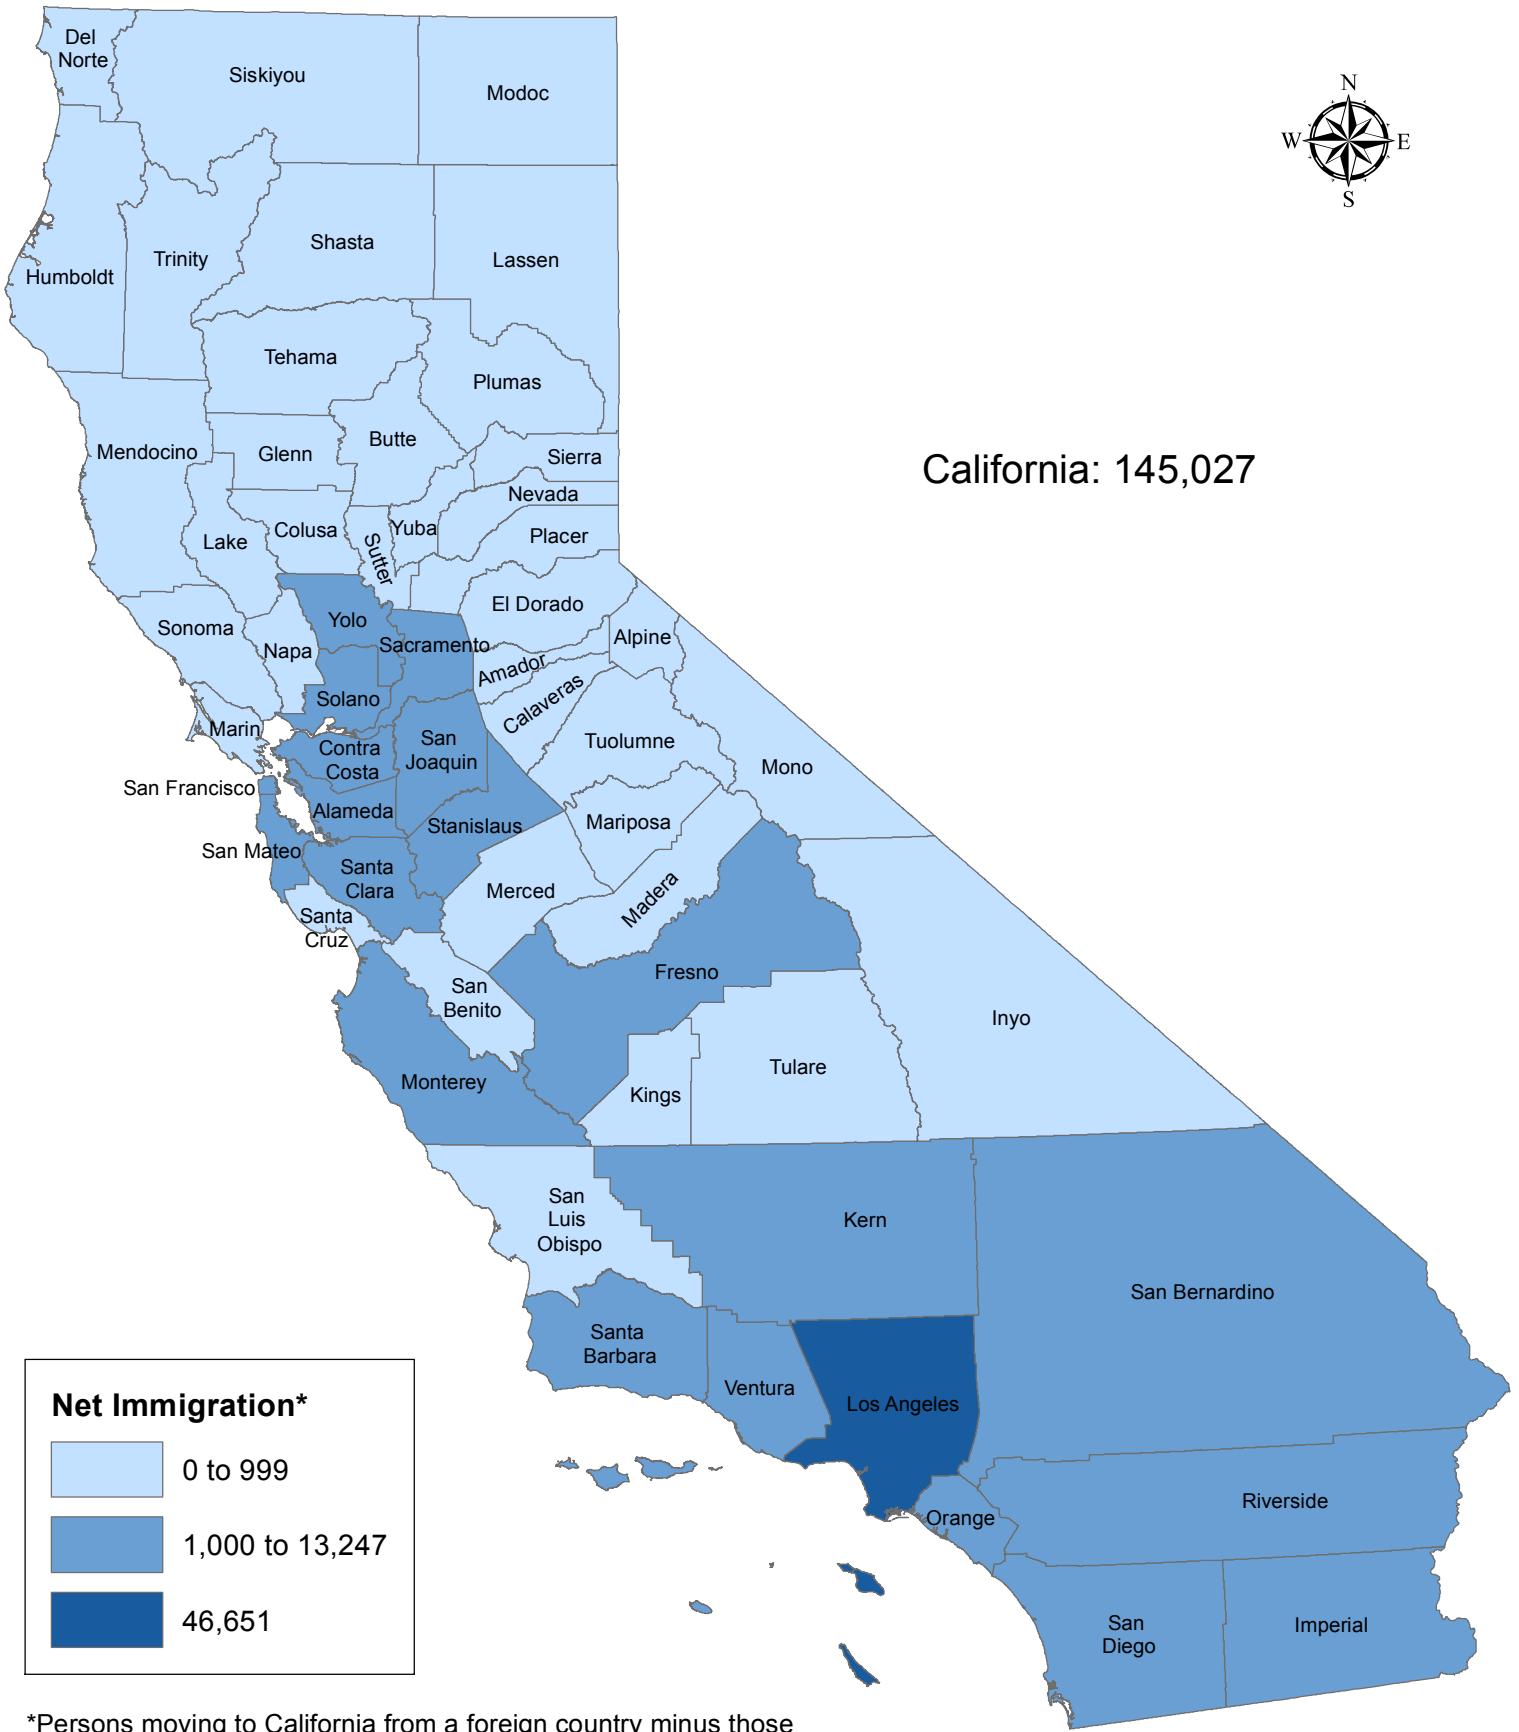

July 1, 2014 to July 1, 2015 Population Estimates Net Domestic Migration

*People moving to California from another U.S. state minus those moving out of California to another U.S. state and movers within California.

Map prepared by: California Department of Finance, Demographic Research Unit, December 2015

July 1, 2014 to July 1, 2015 Population Estimates Net Immigration

*Persons moving to California from a foreign country minus those leaving the state to live abroad.

0 20 40 80 120 160 Miles
